

REGIONAL HEALTH AND HUMAN SERVICES AGENDA IMPLEMENTATION

Community Memorial Foundation, together with the community, will transform the western suburbs of Chicago into the healthiest region in the country.

Our vision complements an unwavering commitment to improve health, foster collaboration, and strengthen organizations that serve our region.

A key strategy to meet this vision, in alignment with our Strategic Plan, has been the shared creation of an integrated *Regional Health and Human Services Agenda* that will result in improved health outcomes for all our neighbors in 27 communities by 2025. The Foundation worked with myriad stakeholders to design a shared Agenda that identifies health and human services priorities for our communities as well as corresponding indicators to track progress toward achieving the vision over a ten-year timeframe.

Community Memorial Foundation seeks to inspire the region to collaboratively take action to advance a shared, cross-sector vision.

Implementation Council

Purpose

The **Regional Agenda Implementation Council** is an ad-hoc advisory body consisting of key stakeholders living, working and/or invested in the communities of the western suburbs, working with CMF board and staff to support the following:

- Implementation of a Regional Health and Human Services Agenda for the western suburbs;
- Engagement of community members to support the implementation of the Regional Health and Human Services Agenda;
- Review of health indicators to monitor progress on the Regional Health and Human Services Agenda.
